

Fussy Eater  
*Solutions*

**Feed your fussy eater nutrition rich food suggested by our dietician nutritionist in Melbourne**

Our principal, Marie-France Laval is a Dietitian Nutritionist based in Melbourne. She has a thorough understanding of nutrition and children and advises parents on ways to improve eating and dietary habits, taking fussy eating into account first.

We understand that it can be challenging to feed your child as they are fussy eaters. Our Children's dietician nutritionist in Melbourne will help you segregate your child's diet and provide nutritional value. Our Nutritionist will also help you form a diet chart for your little one, where they will also offer nutritional value. They know what works and what doesn't work with children, making them an expert at their job.
